

Connection Charges Price Schedule

(applicable from 1 April 2024)

The following charges apply to connection types outlined for standard connection offers in Orion's Connections and Extensions Methodology and required on connection application.

Charges are payable by the party requesting the application.

Full details, including our approach for non-standard connection offers, are available in Orion's *Connections and extensions methodology*. Information on other fees such as connection application fees can be found in our associated service fees listing.

Connection Type	Eligibility Criteria	Charges (excluding GST)
Urban temporary connection (single phase)	Single phase at less than or equal to 60 amps and located less than 30m from existing connectable network	No charge
Urban residential premises or small commercial property	Single phase at less than or equal to 60 amps and located less than 30m from existing connectable network	\$2,070 per premise
Urban residential premises or small commercial property	Infill development (less than or equal to 3 premises) at less than or equal to single phase 60 amps per premise and located less than 30m from existing connectable network capable of accommodating the new capacity	\$2,070 per premise
Urban residential premises or small commercial property	Three phase at less than or equal to 60 amps per phase and located less than 30m from existing connectable network	\$6,210 per premise
Rural single residential premises and small commercial	Rural locations up to 60A and with high voltage augmentation/extension less than 150m from existing connectable network capable of accommodating the new capacity. Installation of low voltage servicemain is the responsibility of the customer.	\$9,000 per premise
Property developments	Brownfields (multiple connections greater than 3 premises) of less than or equal to single phase 60 amps per premises and located less than 30m from existing connectable network	\$2,070 per premise
